NISREEN MOHAMED ABDULKADER

UX/UI DESIGNER

Alexandria, Egypt | 01021755814 | nisreenabdelkader6@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

UX/UI Designer with experience across product design and brand design, creating responsive web and mobile experiences for healthcare, SaaS, service, and e-commerce products. Skilled in turning business requirements and user stories into clear flows, wireframes, prototypes, design systems, and polished interfaces, with hands-on collaboration across product, development, handoff, QA, and iteration.

EXPERIENCE

UX/UI Designer | TAG **Full-Time | Present**

- Started as a Brand Designer and transitioned into UX/UI Design, combining strong visual direction with user-centered product thinking across client products and brands.
- Translate requirements and user stories into information architecture, user flows, wireframes, interactive prototypes, responsive UI, and reusable design patterns in Figma.
- Collaborate with product and development teams through handoff, implementation review, QA, and iterative refinement to maintain usability and visual consistency.
- Selected work includes Criterra, Muslim Will, Agile Pharma, and additional client brands.

UX/UI Designer | SwiftX **Part-Time | Apr 2026-Present**

- Design end-to-end web and mobile product experiences, including multi-role workflows, dashboards, profile flows, sessions, and responsive interfaces.
- Support design systems, visual consistency, developer handoff, implementation review, and selected brand/marketing touchpoints when needed.

Graphic Designer | Freelance **Mar 2022-Present**

- Create logos, visual identities, social media designs, and digital assets from concept through production-ready delivery.

SELECTED UX/UI PROJECTS

Criterra - Clinical Trials Platform: Designed role-based dashboard and workflow concepts for administrators, CRO/pharma users, and healthcare organizations, including trials, referral pipelines, organizations, and reporting.

Muslim Will: Redesigned client and admin experiences across application setup, review workflows, document handling, meetings, and digital signing/attestation, simplifying a complex multi-step journey into clearer role-based flows.

Dentlora - Dental Healthcare Platform: Designed end-to-end doctor and patient experiences across web and mobile, covering appointments, clinical sessions, treatment plans, prescriptions, post-visit care, and profiles, translating detailed user stories into clear, handoff-ready product flows.
